Securicom's e-Purifier

Powerful, Comprehensive Mail Management
and Security Service

End email security hassles with Securicom e-Purifier

Securicom's Email Security Management Solution
protects your business against:

- Email-transmitted security threats such as SPAM, viruses and other malicious content
- The circulation of inappropriate material
- Email abuse by employees (Enterprise version only)
- Bandwidth wastage
- Network congestion
- Contravention of your corporate email usage policy by employees (Enterprise version only)
- Legal liability arising from breaches of confidentiality (Enterprise version only)

No Need for Point Solutions

Securicom e-Purifier includes anti-SPAM, anti-virus and policy compliance message filtering; mail trace and quarantine features and reporting capabilities for managing message security.

Securicom offers two distinct, fully-managed solutions, which are hosted upstream by **Securicom** at a secure data centre.

e-Purifier (Enterprise)

Holistic email security management

e-Purifier (Enterprise) is a complete email security management solution, encompassing:

- SPAM protection
- Multiple layer virus protection
- Content filtering
- Reporting

e-Purifier (Lite)

Best spam and virus protection

E-Purifier (Lite) is aimed at providing an effective base-level email security. e-Purifier (Lite) provides:

- SPAM protection
- Virus protection
- Reporting

securicom
SECURING YOUR INTELLECTUAL PROPERTY

Both solutions are offered on a subscription basis which means:

- **No capital outlay**
- **Low cost** of ownership
- **24/7/365 monitoring support** by Securicom's security experts
- **Securicom** takes care of **upgrades and maintenance** to the system

Simple and non-invasive

Companies **subscribe** to the service. All incoming and outgoing messages are routed via Securicom's infrastructure, **stopping questionable and malicious content before it reaches the client's network.**

A seven-day mail replay is also provided allowing companies to **trace and restore messages** within that window period.

Secure online management portal

Subscribing companies have access to an easy-to-use online management portal, which provides:

- **A single point** to manage your email security management system
- **Superior functionality** for the configuration of message rule sets, across multiple domains to enforce corporate email policies
- Capabilities for message interrogation, analysis and reporting

The e-Purifier difference

- **True Software As A Service**, touch-less to your environment
- Utilises **best-of-breed technologies**
- **Vendor independent** - any company can subscribe and enjoy the benefits
- **Multiple layers** of anti-virus protection
- **Companies have full control of their email** through easy to use web management portal
- **A simplified platform** that allows for consistent, transparent, and flexible system management.
- Configuration, management and reports **are done by the customer** via the **management portal**
- Robust and scalable architecture that can **support email networks of any size**

For more information on e-Purifier, a dynamic demonstration of its capabilities or advice on choosing the most-suitable option for your business requirements, please contact: 0861 591 591 / sales@securicom.co.za.
